

The PPRNet Foundation (TPF) is a member-based organization helping primary care clinicians provide evidence-based, high-value quality care to their patients.

TPF leverages PPRNet's prior success as a long-standing primary care learning and research organization. Just as PPRNet was a network for early EHR innovators at the start of the 21st century, we envision TPF members collectively uncovering the innovations that will help primary care practices continue to survive and thrive.

Opportunities for TPF members include:

- Continuing medical education and network meetings
- Networking in an online community forum
- Sharing best practices and clinical updates
- Assistance with practice transformation and customized consultation services
- Testing mobile health and other new technologies
- Participating in innovative research and quality improvement projects
- Accessing near real-time clinical quality measure and QCDR reporting through our preferred reporting partner, Clinigence

Current subscription TPF consultation services:

- **Virtual PharmD Services:** Access to PharmD on an on-call or consultation basis
- **Chronic Care Management and Remote Monitoring Academy:** 6-month training and support program for staff members to implement CCM and remote monitoring
- **QI Consulting for Value Based Payment Programs:** Annual program includes individualized practice consulting and improvement coaching to maximize performance and incentives through rapid-cycle QI customized to each practice's goals
- **CPC+ Comprehensive Medication Management:** Comprehensive medication management to meet CPC+ practice requirement

No-Cost TPF Demonstration Projects

- Ongoing ACIP updates
- Obesity management

Whatever project you are doing (or want to do) TPF has experience in setup, monitoring, improving work flow, energizing providers and staff and meeting your goals.
